

Pandemic Learning Trends

What is the role of “purpose” in stories that end well?

The stories we are receiving fall on a continuum between stories that end well and stories that don't. As it turns out, “**purpose**” is something that shows up fairly frequently in stories that end well. In future sense-making sessions we hope to understand what that connection is, and what we can do to give rise to more of them.

Please consider sharing an example of your everyday with us, whether it is at work, at home, or in community. Also, please let us know if you would like to join a sense-making session. Please see the links below for more information and story submissions.
